Subject: Uranium Recovery GEIS

Dear NRC,

We are requesting an extension of the comment period for the ISL of uranium in Crook County, WY because we believe the citizens and landowners of this area cannot make an informed decision unless we have an EIS that is not generic to the 9,000 square mile region that runs from the Montana border to the SW corner of Nebraska. We need a more extensive, site specific report, and a public meeting in Crook County where the impact of the mining on the health and well being of our citizens is going to be felt.

Sincerely,
Jack and Mary Ann Sty
