

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
OFFICE OF NUCLEAR REACTOR REGULATION  
WASHINGTON, D.C. 20555

February 23, 1989

NRC INFORMATION NOTICE NO. 89-19: HEALTH PHYSICS NETWORK

Addressees:

All holders of operating licenses or construction permits for nuclear power reactors, and the following fuel facilities: Nuclear Fuel Services of Erwin, General Atomic, UNC Montville, B&W LRC Lynchburg, and B&W Lynchburg.

Purpose:

This information notice is being provided to alert addressees to potential problems resulting from failure of the health physics network (HPN) telephone system and to provide minor revisions to the instructions for the initiation of repairs. Further, the method for establishing communications over the HPN in the event of an emergency is clarified. It is expected that recipients will review the information for applicability to their facilities and consider actions, as appropriate, to avoid future problems. However, suggestions contained in this information notice do not constitute NRC requirements; therefore, no specific action or written response is required.

Background:

The regulations 10 CFR 50.47 and 10 CFR 50, Appendix E, require each licensee to establish provisions for prompt notifications to local, State, and Federal agencies in the event of an emergency. The addressees have met these requirements as related to notifications to the NRC via the installation of the emergency communications subsystems (the emergency notification system (ENS) and the health physics network (HPN)). The ENS is an automatic ring-down service that provides dedicated telephone circuits to the NRC Operations Center. The information contained in Information Notice 86-97, "Emergency Communications System," remains valid regarding the use of the ENS and means to initiate repairs if ENS problems are encountered.

The HPN system consists of (1) the NRC Headquarters Operations Center HPN telephone conference bridge; (2) two commercial local telephone lines to each licensee facility, one line with two telephone sets, usually in the technical support center (TSC), and one line with two telephone sets in the emergency operations facility (EOF); and (3) the HPN communicator telephone in the NRC

890223

PDR T&E Notice 89-019

regional office Incident Response Center. The HPN system is established by the NRC during its standby or initial activation mode of operations after the licensee's TSC/EOF has been activated and is operational. Preliminary information from the licensee (before establishment of the HPN) is provided via the ENS and includes both reactor safety and health physics data. After it has been established, the HPN is the primary means of communicating radiological data (onsite and offsite measurements and dose assessment information) from the licensee to the NRC. The ENS remains the primary means of communicating reactor safety-related information throughout an emergency.

Discussion:

Information Notice 86-97 states that failure of either the ENS or the HPN is to be reported to the NRC Operations Center in Bethesda, Maryland, over the normal commercial telephone system, and that the NRC will make arrangements to have the failed system returned to service. A minor change has been implemented for initiation of repairs to HPN telephone lines. If there is a failure of the HPN telephone service, the licensee is to report the failure to its local telephone service office (usually by dialing 611) so that repairs can be made. The NRC will pay all costs incurred for repairs, and the local service company will bill NRC directly. If a problem arises with a telephone set (which is furnished by the NRC), it is important that the licensee notify the NRC Operations Center (via ENS or commercial telephone service) that an HPN phone is inoperable; it is also important that the licensee notify the NRC Operations Center when the telephone set has been returned to service.

Problems have been experienced during emergency exercises with the establishment of the HPN, and the following procedure is provided as clarification to address these problems. As the NRC and licensee response facilities become staffed, either the NRC regional office or NRC headquarters may decide that establishment of the HPN is warranted. An announcement of this fact will be made over the ENS. It is important that the licensee provide a technically qualified communicator to staff the HPN as soon as possible after the announcement on the ENS. To gain access to the HPN, the licensee's HPN communicator calls the NRC Operations Center in Bethesda, Maryland, on one of the following telephone numbers (in the order listed): (301) 951-1212, (301) 951-6000, or (301) 951-0550. These telephone numbers are already provided on the sticker affixed to each HPN telephone. (If an HPN telephone does not have the affixed sticker, the licensee can contact NRC Telecommunications at (301)492-8000 to obtain one.) The licensee's HPN communicator indicates that he/she is the licensee HPN communicator and that he/she would like to be connected to the HPN teleconference bridge. It is important that the communicator have direct access to health physics and dose assessment information.

No specific action or written response is required by this information notice. If you have any questions about this matter, please contact one of the technical contacts listed below or the Regional Administrator of the appropriate regional office.

Attachment: List of Recently Issued NRC Information Notices

LIST OF RECENTLY ISSUED  
NRC INFORMATION NOTICES

Information Notice No.	Subject	Date of Issuance	Issued to
89-18	Criminal Prosecution of Wrongdoing Committed by Suppliers of Nuclear Products or Services	2/22/89	All holders of OLs or CPs for nuclear power reactors.
89-17	Contamination and Degradation of Safety-Related Battery Cells	2/22/89	All holders of OLs or CPs for nuclear power reactors.
89-16	Excessive Voltage Drop in dc Systems	2/16/89	All holders of OLs or CPs for nuclear power reactors.
89-15	Second Reactor Coolant Pump Shaft Failure at Crystal River	2/16/89	All holders of OLs or CPs for nuclear power reactors.
89-14	Inadequate Dedication Process for Commercial Grade Components Which Could Lead to Common Mode Failure of a Safety System	2/16/89	All holders of OLs or CPs for nuclear power reactors.
89-13	Alternative Waste Management Procedures in Case of Denial of Access to Low-Level Waste Disposal Sites	2/8/89	All holders of NRC specific licenses.
89-12	Dose Calibrator Quality Control	2/9/89	All NRC medical licensees.
89-11	Failure of DC Motor-Operated Valves to Develop Rated Torque Because of Improper Cable Sizing	2/2/89	All holders of OLs or CPs for nuclear power reactors.
89-10	Undetected Installation Errors in Main Steam Line Pipe Tunnel Differential Temperature-Sensing Elements at Boiling Water Reactors.	1/27/89	All holders of OLs or CPs for BWRs.

OL = Operating License  
CP = Construction Permit
