

UNITED STATES
NUCLEAR REGULATORY COMMISSION
ADVISORY COMMITTEE ON REACTOR SAFEGUARDS
WASHINGTON, D. C. 20555

July 19, 1993

MEMORANDUM FOR: Dick Savio
FROM: Mark Stella 
SUBJECT: FELLOWSHIP PROGRAM FILES

I recommend that we promptly initiate action to microfilm all existing technical document files for the Fellowship Program in order to assure preservation of the information contained in the files. Due to strict storage space limitations in the TWFN facilities we may find it impossible to maintain at least one hard copy of each report from the inception of the program, as is now our practice.

This recommendation was made once before, over a year ago. To my knowledge, no action has been taken on the earlier recommendation. With the impending date of the move to TWFN drawing inexorably closer, we may have very little time left to assure that the technical record of the Fellowship program can be preserved.
