Thanks, Patt, for the "introduction" to Donald. Just one point of clarification regarding the BOC consideration of the Harris Lake Study. As you indicated, we definitely would like the BOC to receive it September/October 2008. However we are not certain what form of consideration/action they will take: the study report could be directed to a subcommittee and/or their action could be to receive and accept and not consider adoption. That step has not been determined at this time.

Don,

As we discussed at your meeting on June 9th, please find below the link to the Wake County Southwest Area Land Use Plan (SWALUP) which was adopted on July 9, 2007.

<http://www.wakegov.com/planning/landuse/SouthwestALUP.htm> There is a link in the upper right corner of the page to the final plan document. The SWALUP refers to the need for a more detailed plan for the Harris Lake Drainage Basin which is the study that is now underway. The Harris Lake Plan is scheduled to be adopted this fall and will be forwarded to you when finalized.

You and your team will also find lots of useful information on the main Wake County Planning website - <http://www.wakegov.com/NR/exeres/D2C58B7D-DFB9-4296-B015-9F9099744755.htm>

Sharon Peterson, Wake County Long Range Planning Administrator, (copied on this email) would be a good contact for your team.

Let us know if we can be of further assistance.

Patt
