

**Note to File:**

On September 30, 2008, I received a phone call from Mr. Chris Mousseau. He is employed by Kidde – Fenwal and exempt distribution licensee. License No. 20-15285-03E, docket nO. 03032498. He indicated that he just found out that 10 CFR 32.29 had been revised. In the past it required that Part 32 licensees send in a report in accordance with 32.29 (every five years). It now requires that a report be sent every January, which contains distribution information for the previous year. I spoke with Duncan White, he indicated that the regulation changed in 2007. Mr. Mousseau stated that the last report he sent to NRC covered the period of 2002 through 2006. So it appears that he missed 2007. He will send in the required report ASAP. He also stated that for the past 2 years he hasn't received any information from NRC in the mail. I provided his name and number to Tony Kirkwood in HQ to follow up and I provided Tony's contact information to Mr. Mousseau. This appears to be a SLIV violation which the licensee identified and corrected. The next inspector should confirm the information regarding this issue and disposition the finding accordingly. Potential SL IV violation/NCV. Mr. Mousseau 's cell phone number is 508-958-0775.
