**Subject: Shearon Harris Nuclear Power Plant Units 2 and 3
Docket Nos. 52-022 and 52-023
Supplemental Information for Environmental Audit –
Calculation Native Files**

Reference: Letter from James Scarola (PEC) to NRC, dated February 18, 2008, "Application for Combined License for Shearon Harris Nuclear Power Plant Units 2 and 3, NRC Project Number 738"

Ladies and Gentlemen:

In the referenced letter, Progress Energy Carolinas, Inc. (PEC) submitted an application for a combined construction and operating license (COL) for Shearon Harris Nuclear Power Plant Units 2 and 3 (HAR 2 and 3) located in Wake County, North Carolina.

During July 14-17, 2008, an NRC team conducted an Environmental Audit to gather information to assist in the review of the Environmental Report (ER) submitted with the application. The purpose of this letter is to submit calculation native files requested by the NRC team during the audit.

The supplemental information contained in the files on the attached DVD is provided to support the NRC's review of the HAR ER but does not comply with the requirements for electronic submission in NRC Guidance Document, "Guidance for Electronic Submissions to the NRC," dated November 20, 2007. The NRC staff requested the files be submitted in their native formats, required for utilization in the software employed to support the ER development.

As discussed with the NRC's environmental project manager responsible for review of the HAR ER, the data provided on the attached DVD are of a nature that are not easily convertible to PDF output files. Furthermore, PEC understands that converting the information to PDF output files would not serve the underlying purpose of the submittal; i.e., to provide the raw, unprocessed data to enable reviewers to evaluate software used in the HAR application.

Enclosure 1 provides a list of folders with the requested data files that are included on the attached DVD.
