

STATE OF ALABAMA DEPARTMENT OF
PUBLIC HEALTH

Donald E. Williamson, MD
State Health Officer

October 9, 2008

Mr. Terrence Reis, Deputy Director
Division Materials Safety and State Agreements
Office of Federal and State Materials and
Environmental Management Programs
U.S. Nuclear Regulatory Commission
T8-E24
Washington, D.C. 20555-0001

Dear Mr. Reis:

Enclosed is a copy of our legally binding requirement for the National Source Tracking System Part 20. This license condition text will be amended to all of our Increased Control licensees before December 31, 2008. This text refers to NRC rules to which we currently do not have an equivalent. Therefore, we will include a copy of the referenced 10 CFR 20.2207 and Appendix E to 10 CFR Part 20 as an attachment to the cover letter that will accompany each license amendment. These legally binding requirements correspond to the following equivalent amendments to NRC's regulations:

<u>Rats ID</u>	<u>Title</u>	<u>State Section</u>
2006-3	National Source Tracking System Part 20	License Condition

We believe adoption of these legally binding requirements through license condition satisfies the compatibility and health and safety categories established in the Office of Federal and State Materials and Environmental Management Programs (FSME) Procedure SA-200.

If you have any questions, please feel free to contact me at 334-206-5391, or by e-mail at dwalter@adph.state.al.us.

Sincerely,

David Walter, Director
Radioactive Material Licensing
Alabama Office of Radiation Control

Enclosure

License Condition for Increased Control Licensees for the National Source Tracking System Part 20

The licensee must comply with the initial inventory reporting requirement in 10 CFR 20.2207(h) for nationally tracked sources by the dates imposed in that paragraph. The licensee must also comply with the reporting requirements for transactions involving nationally tracked sources in 10 CFR § 20.2207. This section includes the requirement to report any manufacture, transfer, receipt, disassembly, or disposal of a nationally tracked source, otherwise allowed by this license, by the close of the next business day after the transaction. A nationally tracked source, as defined in 10 CFR § 20.1003, refers to a sealed source containing a quantity equal to or greater than Category 1 or Category 2 levels of any radioactive material listed in Appendix E to 10 CFR Part 20 – “Nationally Tracked Source Thresholds.”
