

13.4S Operational Program Implementation

Commission Paper SECY-05-0197 focused on those programs that meet the following three criteria: required by regulation, reviewed in the combined license (COL) application, and inspected to verify program implementation as described in the Final Safety Analysis Report (FSAR). Descriptions of these operational programs, consistent with the definition of “fully described” in the Staff Requirements Memorandum for SECY-05-0197, are provided in the FSAR sections noted in Table 13.4S-1. Implementation milestone commitments are also provided in the table. In accordance with SECY-05-0197, because these programs and their implementation are fully described, they will not require inspections, tests, analyses, and acceptance criteria.
