

18H Supporting Analysis for Emergency Operation Information and Controls

The information in this appendix of the reference ABWR DCD, including all subsections and tables, is incorporated by reference with the following standard departure.

STD DEP T1 2.14-1.

As required by Section IV.A.3 of the ABWR Design Certification Rule, the plant-specific DCD must physically include the proprietary and safeguards information referenced in the ABWR DCD. Appendix 18H in the reference ABWR DCD references proprietary information. That proprietary information is provided below, has finality in accordance with Section VI.B.2 of the ABWR Design Certification Rule, and does not constitute a supplement to or departure from the reference ABWR DCD, except for those changes that are ~~identified in ABWR Licensing Topical Report NEDE 33330P, "Advanced Boiling Water Reactor (ABWR) Hydrogen Recombiner Requirements Elimination", dated May 2007. These changes are incorporated in the Proprietary version of this appendix and are~~ indicated as strikeouts of actions deleted as a result of the removal of the Flammability Control System (FCS). In all other respects, this appendix is unchanged and appears as it did in the certified design.
