Subject: Revised Physical Inventory Summary Report

Reference: NRC License SNM-1097, Docket 70-1113

Physical Inventory Summary Reports for the Global Nuclear Fuel – Americas, LLC (GNF-A) facility for the period of April 27, 2007 through April 14, 2008 were submitted on June 13, 2008 in accordance with 10 CFR 74.17(a).

During an internal review of statistical calculations used to calculate inventory difference limits for material type 20, E1 (uranium enriched up to 5%), an error was discovered for a key measurement system that caused the limits to be stated incorrectly. A revised Form 327 is attached to reflect the corrected limits. The adjusted inventory difference and other values continue to be within acceptable limits.

GNF-A requests that the attachment to this letter be withheld from public disclosure under 10 CFR 2.390(d) as it contains safeguards information associated with our material control and accounting program.

Please contact me at (910) 675-5950 or Rosemarie Martyn at (910) 675-6411 if you should have any questions or would like to discuss this matter further.

Sincerely,

A handwritten signature in black ink that reads 'Scott P. Murray'. The signature is written in a cursive style with a large 'S' and 'M'.

Scott P. Murray, Manager
