Steven,

The Connecticut Department of Environmental Protection's (CT DEP), Division of Radiation has performed a confirmatory radiological survey at the Conopco inc. waste storage facility in Trumbull CT, NRC license number 29-30984-01.

The results of the survey show no residual radioactivity as a result of licensed activities performed by Conopco at the waste storage facility.

In addition, the CT DEP agrees with the NRC's conclusion of the Finding of No Significant Impact (FONSI), determined in the NRC's Environmental Assessment.

Please let me know if you have any questions.

Mike Firsick

Supervising Radiation Control Physicist

Connecticut Department of Environmental Protection
