Subject: RE: Draft RAIs for Nickel Alloy Inspection Program

Hi Kim,

Due to some recent schedule changes it looks like next week would be better for IPEC.

Tuesday - any time after 12:00 p.m.

Wednesday - any time in the morning through 1 p.m.

Donna,

The technical reviewer is not available tomorrow afternoon; however, he is available between 9:00 am and 12:00 pm on Thursday, and on Friday all day. We only need to have a telecon if Entergy needs clarification from the NRC staff. If Entergy understands the draft RAIs as written, then we can forego the telecon and transmit the RAIs as final.

Let me know what time works. Also, we can do one next week if that works, but I'd just be calling in from the site.

Kim

Kim,

Would the NRC be available tomorrow at 1:00 p.m. for the teleconference on the Draft RAI for the Nickel Alloy Inspection Program? We would need three lines.

Thanks,
Donna

Donna,

Attached are draft requests for additional information related to the Indian Point license renewal application. Please review and provide me with a couple of possible times for a telecon to discuss. The purpose of the telecon will be to obtain clarification on the staff's questions.

Thanks,

Kim Green
