**Significant Change in
Facility Administration**

Re: Facility License R-56, Docket Number 50-83

As required by our Technical Specifications, Section 6.6.3, Paragraph(1), we are reporting a significant change in our facility organization at Level 3 which is the level responsible for the day-to-day operation of the University of Florida Training Reactor(UFTR).

For a number of years I had filled the Level 3 position(Reactor Manager) while also serving as the Level 2 Director of Nuclear Facilities with periodic Acting Reactor Managers when needed and experience levels allowed. Effective September 8, 2008, Mr. Brian Shea has been hired to fill the Reactor Manager position on a permanent basis. He is a former SRO at the UFTR and has industry experience as well as a Bachelor's Degree from our Nuclear and Radiological Engineering Department here at the University of Florida. He will soon be taking the examination to be certified again as a Senior Reactor Operator. If further information is needed, please let us know.

Thank you for your consideration.

Sincerely,

William G. Vernetson
Director, Nuclear Facilities
