Re: Requested additional information to an NRC Materials License application
Docket No. 03037395, and Control No. 142764

Dear Mr. Lawyer:

The following information is sent in response to your letter dated Sept. 19, 2008.

ITEM 1

a. Mr. Peter Mas, the consultant-RSO, will collaborate with our practice. Mr. Mas is a board certified medical health physicist and will be in charge of the radiation safety program. Should any staff member fail to adhere to his guidance and/or corrective actions, Mr. Mas will defer to me (the owner) for support of the corrective action taken. Mr. Mas remains free to resign from our enterprise if such a step were necessary and his resignation would force the office to cancel all services until a replacement is found.

b. Mr. Mas will direct our management on the expenditure of funds for the equipment and materials required to operate a safe and effective imaging service.

c. The consultant-RSO is responsible for the radiation safety program management of Hartford Hospital, Hartford, CT and of New Milford Medical Group, New Milford, CT. Our practice operates the cardiac imaging service one day per week. Mr. Mas anticipates being onsite approximately 1 hr per month for our licensed use of unit doses.

d. The in-house representative and point of contact with the RSO will be the nuclear cardiology imaging technologist. The practice manager may also be a point of contact.

e. The consultant-RSO is available to respond to questions or operational issues via telephone, pager service and email. In the event of an emergency which requires the presence of the RSO (during normal working hours) Mr. Mas can be at our office within one to one and a half hours time.

ITEM 2

Mr. Peter Mas' contact information is:

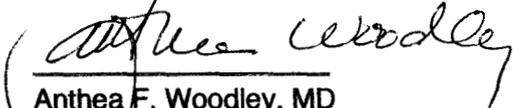

Telephone- 860-545-2676,

Fax numbers- 860-545-5650, 860-545-1052

Email address- pmas@snet.net

Should you have any questions or desire additional information regarding our private, nuclear cardiology imaging office, please contact me at 860-423-9207.

Respectfully submitted,

Anthea F. Woodley, MD
FACC, FAHA
