Rich

Attached is additional information for the staff reviewer of the subject relief request. This information relates to pump 2ICS*P1 (the reactor core isolation cooling pump) and is from the NDE report for the pump. As noted in the relief request, approximately 17% of each of the four subject welded attachment welds (PW400, PW401, PW402, and PW403) is inaccessible due to the design. Please let me know if there are any questions on the attached information.

Dennis
