Subject: RE: Draft Environmental Assessment for State Review, DLA New Haven, Indiana

Mr. Lawyer,

Indiana Radiological Health Staff have reviewed the Draft Environmental Assessment, which was an attachment on your original e-mail, dated October 2, 2008. Indiana concurs with the U.S. NRC, "finding of no significant impact to the quality of the human environment". This is in reference to a Source Materials license amendment request to use site specific derived concentration guideline levels (DCGL's) for unrestricted release criteria at the U.S. Government's, Defense Logistics Agency (DLA), Defense National Stockpile Depot, located in New Haven, IN. We understand that the licensed activities involving natural uranium and thorium mixtures have been terminated and the DLA was requesting the unrestricted use criteria for the Depot facility.

Should there be any future changes and/or modifications to USNRC's conclusions, the Indiana State Dept. of Health requests further involvement and consultation.
Thank you for the opportunity to review this EA as it impacts the State of Indiana.

Regards. Rex

Please review the attached Draft Environmental Assessment for Defense Logistics Agency request for site specific derived concentration guideline levels (DCGLs) for their facility in New Haven, Indiana. Please review and send comment to me within 30 days.

Thank You,

Dennis Lawyer
