October 9, 2008

James Lynch  
United States Nuclear Regulatory Commission  
2443 Warrenville Road  
Lisle, IL 60532-4352

Dear Mr. Lynch,

This letter pertains to the information I received on October 1, 2009 that the NRC is assuming control of NARM. To conform to this change I would like to submit the following amendment to our Material License 24-32157-01:

Please amend this license to allow our use of Radium 226 Be.

We currently have one gauge with this material as a source: Seaman C-200.

Please contact Mike Stanley if you have any questions at (417) 818-8439.

Sincerely,

Mike Stanley, RSO  
Journagan Construction Co., Inc.
