Region III

Re: License number 21-19111-02
Docket number 030-18632

To Whom It May Concern:

Magna Chek, Inc. would like to request an extension amendment to our current license # 21-19111-02 for another year for storage only. Mr. Douglas Poling is the CEO and is still in charge of the material and program. The material in possession is in a secure area and is only being stored. No changes to the storage personnel or RSO have happened in the last year. We have no other use for the material and would truly like to dispose of it. However, we are having extreme difficulties in finding a suitable end user to take the material. We take this opportunity to request our storage only license to be renewed or amended for an additional year to 2009. If any further information is required, please do not hesitate to contact me.

Regards,

Scott Bucholz
