Redacted Comment

i believe that the proposed regulations that the Nuclear Regulatory Commission proposes is quiet interesting and right. I mean if the lives of innocent people are in danger of dying or being harmed their should be a regulation that punishes the people that introduce such weapons into the facilities.
I believe that this is correct because i believe that its common sense that if someone introduces a weapon into a facility without permission its because they mean harm. It can be considered a federal crime but at the same time the rule should not effect the organizations that mean no harm ti the people.
