OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Regulation Document

This regulation of making a federal law against weapons in nuclear facilities should be passed because it helps protect a problem that can be easily corrected. It is common sense that bringing weapons into a nuclear facility without the proper authorization can only be a problem and never be a good thing. The idea of making a federal law ban weapons without authorization works very well with the AEC and should be a prime example of why the NRC should also accept this proposal. The proposal should be very specific on what a "dangerous weapon" is and be specific on how the federal judicial system will punish those who break this law. The proposal is very specific and deals with every problem that could come along with passing a law such as this one. Overall, it would be a wise choice to pass this into legislation.
