Subject: Withdrawal of AOS Transport Packaging System Application

Reference: Docket No. 71-9316 (TAC No. L24142)

Based on discussions between Alpha-Omega Services, Inc (AOS), General Electric-Hitachi Nuclear Energy Americas, LLC (GE) and the U.S. Nuclear Regulatory Commission (NRC) Spent Fuel Storage and Transportation (SFST) personnel, AOS hereby withdraws the above referenced application for the AOS Transport Packaging System.

AOS is submitting this withdrawal request with the intent of revising the application to include the additional information as requested by the NRC technical review staff for completion of the Safety Evaluation Report and draft Certificate of Compliance (CoC). AOS believes that a revised application will enable the NRC personnel to complete the technical review and generate the Safety Evaluation Report and draft CoC in a timely manner.

It is AOS's understanding that open technical issues, including information required to complete the Safety Evaluation Report, will be communicated to AOS via letter. Upon receipt of this letter AOS will develop and resubmit to the NRC the consolidated and revised application.

Thank you for the hard work and time the NRC staff has put into the review to date. We look forward to working with the SFST staff on our consolidated and revised submission.

If you have any questions please do not hesitate to contact me at (562) 804-0604 ext 24.

Best Regards,

Troy Hedger, CEO
Alpha-Omega Services, Inc.
