Subject: Submittal of Toshiba Topical Report of NRW-FPGA-Based Power Range
Monitor (PRM) System Qualification

Reference: NRC Project Number 729; NRC Docket Number 00000729

Ladies and Gentlemen:

Toshiba is hereby submitting Revision 0 of our Topical Report on our project to describe Toshiba's design, development, peer review, test, qualification, and manufacturing processes for our NRW-FPGA-based power range neutron monitoring system for US nuclear safety-related applications. Toshiba is submitting this topical report under the NRC licensing topical report program for review for referencing in licensing actions. Hereafter, it is our intention to keep the NRC informed of FPGA-based I&C systems through status meetings and submission of supporting information, as required by the NRC.

Enclosed you will find one (1) original of UTLR-0002-P, "Topical Report of NRW-FPGA-Based Power Range Monitor (PRM) System Qualification (PROPRIETARY MARKUP VERSION)" dated October 6, 2008, and one (1) original of UTLR-0002-NP dated October 6, 2008, which is the non-proprietary markup version of this report. Please note that the proprietary document has been marked to show the proprietary material using double brackets ([[and]]) and red-brick font, or square enclosure.

Please note that we are submitting both proprietary and non-proprietary versions of the topical report. The attached affidavit, prepared in accordance with 10 CFR Part 2.390(b) and endorsed by an officer of Toshiba Corporation, designates the proprietary version of the topical report, and the proprietary version of the supporting documents, to be Toshiba Proprietary material and requests the NRC to withhold this proprietary information from public disclosure.

Should you have any questions regarding this request, please contact Ms. Rossnyev Alvarado at (703) 519-0200 or via e-mail at ralvarado@mpr.com, or Mr. Naotaka Oda via e-mail at naotaka.oda@toshiba.co.jp.

Sincerely,

A handwritten signature in black ink, appearing to read "K. Oshima", written over a horizontal line.

Koichiro Oshima
Senior Manager
Plant Project Engineering Department
Nuclear Energy Systems & Services Division

(re: Proprietary Information)**

Request for Withholding from Public Disclosure & Affirmation of Affidavit

Enclosures to this Letter include the documents listed below, which specifically apply to the Toshiba Nuclear Qualification Project and are considered to be proprietary. All of this information and each of these documents are specifically designated as "TOSHIBA PROPRIETARY."

In accordance with 10 CFR Part 2.390(b), it is requested that these documents be withheld in their entirety from public disclosure on the basis of Part 2.390(a)(4). These documents describe Toshiba's design, development, review, test, qualification, and manufacturing processes for NRW-FPGA-based power range neutron monitoring systems for US nuclear safety-related applications. Disclosure of information in these documents would cause substantial harm to the competitive position of the Toshiba Corporation, as there are other competing companies who have or wish to qualify controllers for this safety-related application in nuclear power plants. Competing firms could use this information to benefit their own equipment qualification efforts and/or product design.

I, Koichiro Oshima, being duly sworn upon oath, am a Senior Manager of Plant Project Engineering Department of Toshiba Corporation on whose behalf I am authorized to attest that the contents of the documents listed below are true and correct to the best of my knowledge and belief.

I certify under penalty of perjury that the foregoing is true and correct.

Signed:

Koichiro Oshima
Senior Manager
Plant Project Engineering Department
Nuclear Energy Systems & Services Division
