George,

Attached is DRAFT RAI No. 22. You have ten working days to review it and to decide whether you need a conference call to discuss it. After the call or after ten days the RAI will be finalized and sent to you. You then have 30 days to respond.

John Rycyna, PE  
Project Manager  
Division of New Reactor Licensing  
Office of New Reactors  
U.S. Nuclear Regulatory Commission

Calvert Cliffs Unit 3  
UniStar  
Docket No. 52-016

SRP Section: 14.02 - Initial Plant Test Program - Design Certification and New License Applicants  
Application Section: 14.2

QUESTIONS for Quality and Vendor Branch 1 (AP1000/EPR Projects) (CQVP)

14.02-8

Standard Review Plan (SRP, NUREG-0800) Section 14.2.II.3.A.ii, concerning acceptance criteria for combined license (COL) and operating license applicants, "Management Organizations," states that "[t]he applicant should provide (1) the organizational descriptions for any augmenting organizations or other personnel who will manage or execute any phase of the test program, and (2) the responsibilities, interfaces, and authorities of the principal participants."

The applicant's FSAR, Section 14.2.2 "Organization and Staffing," states in part that "[t]he plant operating, maintenance, and engineering personnel are utilized to the extent practicable during the Startup Test Program. The plant staff operates permanently installed and powered equipment for Phases I through IV and subsequent system tests. Plant personnel such as instrument and controls, chemistry, computer, radiation protection, and maintenance personnel are used to perform tests and inspections in the areas in which they will primarily work during plant operation." Section 13.1 of the applicant's FSAR, "Organizational Structure of Applicant," provides some details on the roles and responsibilities of plant staff.

The applicant's FSAR in sections 14.2.2 and 13.1 does not specify the responsibilities, interfaces, and authorities of the principal participants of the plant staff as they relate to the initial test program. The NRC staff requests that the applicant supplement section 14.2.2 of its FSAR to include further details on the responsibilities, interfaces, and authorities of the principal participants of the plant staff as they relate to the initial test program as described in the SRP, or to justify an alternative.
