Donald C. Cook Nuclear Plant Units 1 and 2
CORRECTION OF TYPOGRAPHICAL ERROR IN LIMITING CONDITION OF OPERATION 3.0.7

Reference: Letter from J. Donohew, Nuclear Regulatory Commission, to M. K. Nazar, Indiana Michigan Power Company, "D. C. Cook Nuclear Plant, Units 1 and 2 - Issuance of Amendments for the Conversion to the Improved Technical Specifications with Beyond Scope Issues (TAC Nos. MC2629, MC2630, MC2653 through MC2687, MC2690 through MC2695, MC3152 through MC3157, MC3432 through MC3453)," dated June 1, 2005 (Accession Number ML050620034).

Dear Sir or Madam:

By Reference 1, the U. S. Nuclear Regulatory Commission (NRC) issued Amendment Numbers 287 and 269 to Donald C. Cook Nuclear Plant (CNP) Unit 1 and Unit 2 Facility Operating Licenses DPR-58 and DPR-74, respectively. These amendments approved the conversion of the CNP Unit 1 and Unit 2 current Technical Specifications (TS) to the Improved Technical Specifications (ITS) consistent with Improved Standard Technical Specifications as described in NUREG-1431, "Standard Technical Specifications – Westinghouse Plants," Revision 2.

Indiana Michigan Power Company (I&M) has identified an administrative error in both CNP Unit 1 and Unit 2 TS 3.0, Limiting Condition of Operation (LCO) Applicability. Specifically, on both CNP Unit 1 and Unit 2 TS pages 3.0-2, in describing test exception LCO 3.1.8 the title "PHYSIC TESTS..." should be changed to read "PHYSICS TESTS..."

Therefore, I&M requests that the NRC issue revised pages to Amendment Numbers 287 and 269 to CNP Unit 1 and Unit 2 Facility Operating Licenses DPR-58 and DPR-74, respectively, to correct this administrative error.

A001
