P.O. Box 817  
La Crosse, WI 54602-0817

SUBJECT: LA CROSSE BOILING WATER REACTOR (LACBWR) MASTER INSPECTION  
PLAN - FISCAL YEAR (FY) 2009

Dear Mr. Berg:

In accordance with U.S. NRC Inspection Manual Chapter 2561, "Decommissioning Power Reactor Inspection Program," the NRC Region III staff and management have developed a Master Inspection Plan (MIP) for LACBWR. The plan is based on your current performance and schedule of significant decommissioning activities planned for the site from October 2008 through September 2009 (FY2009). The plan outlines how we intend to focus our Regional inspection resources to address significant ongoing decommissioning activities.

Because the FY2009 MIP is based, in part, on your proposed schedule of significant decommissioning activities for FY2009, the plan and the focus of NRC inspection activities may change to reflect a change in your planned decommissioning activities or your performance. In order to ensure that the FY2009 MIP remains current, we request that you keep the Materials Control, ISFI, and Decommissioning Branch staff informed of any significant changes in your proposed schedule of decommissioning activities. You will be informed of any significant changes to the LACBWR FY2009 MIP.

We currently project the Region will conduct an inspection at LACBWR during FY2009 to evaluate spent fuel pool safety and related routine decommissioning activities. Additional inspections will be scheduled as necessary regarding the construction of a large tank in the reactor cavity that will hold the dry fuel storage casks for off-loading the fuel. The Region will also conduct an inspection to evaluate the design and construction of the dry fuel storage pad. This may involve several onsite observations in addition to in-office review. Following is a list of the inspection procedures we expect to use during our inspections. The specific procedures used during each inspection will depend on the specific decommissioning activities being conducted. Additional inspection procedures may be used or inspections conducted if decommissioning activities warrant.

Security-related inspection activities will be addressed in a separate MIP.

<u>Inspection Procedure</u>	<u>Inspection Procedure Title</u>
IP 36801	Organization, Management and Cost Controls
IP 37801	Safety Reviews, Design Changes, and Modifications
IP 40801	Self-Assessment, Auditing, and Corrective Action
IP 60801	Spent Fuel Pool Safety
IP 62801	Maintenance and Surveillance
IP 60856	Review of 72.212(b) Evaluations
IP 60853	Onsite Fabrication of Components and Construction of an Independent Spent Fuel Storage Installation
IP 71801	Decommissioning Performance and Status Review
IP 83750	Occupational Radiation Exposure
IP 84750	Radioactive Waste Treatment, and Effluent and Environmental Monitoring
IP 86750	Solid Radioactive Waste Management and Transportation of Radioactive Materials

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

We will gladly discuss any questions you may have regarding these inspection plans. If you have questions, please contact William Snell of my staff at (630) 829-9871.

Sincerely,
