.Mr. Kennedy, This is the form of which we spoke on 9/30/2008. Notice that there is no inspection result indicated.

You have received an amendment authorizing a single gauge and will receive annual bills for the license, because of the "pending resumption" request. The license also has a two year hence expiration date at which time NRC will contact you to determine the further status as you agreed with Ms Johansen on April 23, 2008.
