SUBJECT: CHILDREN'S NATIONAL MEDICAL CENTER, LICENSE AMENDMENT,
CONTROL NO. 142858

Dear Mr. Zechman:

This refers to your license amendment request. Enclosed with this letter is the amended license. Please note that several of the requested isotopes have been included under your possession limit for radionuclides with atomic number 3-83 (Item 6.A. of your license). In addition, please note that Section 651(e) of the Energy Policy Act of 2005 expanded the definition of byproduct material to include NARM, therefore, the cobalt-57 sealed sources requested are already included on your NRC license as long as the sources meet the requirements in 10 CFR 35.65. If any sources do not meet the requirements in 10 CFR 35.65, please submit an amendment request identifying the manufacturer and model number for each source.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Medical, Academic, and Industrial Uses of Nuclear Material**; then **Regulations, Guidance, and Communications**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-888-293-6498. The GPO is open from 7:00 a.m. to 8:00 p.m. EST, Monday through Friday (except Federal holidays).
