Subject: Re: AGU abstract on volcanism

Your values depend on spatial and temporal assumptions which you have not explained within the abstract.. For example, what is the source area, what is the recurrence rate (and basis) you are using, what is the assumed dike dimension, etc. You appear to be using a pure temporal argument, like picking marbles out of a jar. I really would appreciate you presenting the total basis of your numbers to the group of us who are concerned.
