## **NRC WORKSHOP DEC. 10-11 FOCUSES ON OVERSEEING NEW REACTOR CONSTRUCTION**

The Nuclear Regulatory Commission will hold a public workshop Dec. 10 – 11, in Rockville, Md., to share insights and lessons learned for companies supplying parts for new reactor construction.

“We’re looking for an open discussion with current nuclear plant operators, plant component vendors and other interested groups,” said Glenn Tracy, Director of the Division of Construction Inspection in the NRC’s Office of New Reactors. “We want everyone involved to understand what our safety requirements are, how we monitor quality assurance programs and other areas vital to proper reactor construction.”

The workshop runs from 9 a.m. to 5 p.m. on Dec. 10, and from 8 a.m. to 2 p.m. on Dec. 11, at the Marriott Bethesda North, 5701 Marinelli Rd. in Rockville. On Dec. 11, NRC staff will be available from 2 - 5 p.m. for additional discussions. Those interested in attending the workshop are encouraged to pre-register by Nov. 26 by visiting this NRC Web page: <http://www.nrc.gov/public-involve/conference-symposia/vendor-oversight/registration.html>.

Additional workshop information is available on the NRC Web site here: <http://www.nrc.gov/public-involve/conference-symposia/vendor-oversight/index.html>. Individuals with disabilities should request reasonable accommodations for participating in the workshop by contacting Aida Rivera-Varona (via e-mail at [Aida.Rivera-Varona@nrc.gov](mailto:Aida.Rivera-Varona@nrc.gov) or via phone at (301) 415-4001) by Dec. 1.
