US Nuclear Regulatory Commission
Washington, D.C. 20555-0001

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

September 25, 2008

Dear Chairman Klein (other Commission Gregory B. Jaczko, Peter B Lyons)

This letter is to request that License Applications 1VV023 and XW013 be denied. These permits would allow a private Corporation; Energy Solution ;Inc .to transport and process nuclear waste in Tennessee .

Tennessee is biologically diverse and rich in natural resources. Radioactive nuclear waste contaminates everything—the air, the soil, the water, plants , animals and people . I see no benefit to the people of Tennessee by allowing European or any other nuclear waste to be brought into tour state to be processed and stored here.

Respectfully

Linda G. Nadeau
800 Tennessee Ave.
Athens, TN. 37303
