Lisle, IL 60532-4352

To Whom It May Concern:

This letter is in response to the notice we received from the state of Missouri stating that you now regulate all accelerator produced materials. We would like to amend our NRC license (# 24-32578-01 Mexico Cardiovascular Associates, LLC) to include the following isotopes:

<u>Isotope</u>	<u>Max Qty</u>	<u>Physical Form</u>	<u>RAM Usage</u>	<u>Usual Dose</u>
Thallium-201	50 mCi	Liquid	Diag/Imaging	5 mCi
Cobalt-57	25 mCi	Sealed Source	Calibration	N/A

A copy of our Missouri license has been attached to this amendment for your review. Should you have any additional questions or need additional information, please contact our Health Physicist, Marcia West at 816-807-8090 or fax number 816-974-1443.

Sincerely,

Marvin Feldman, CNMT

Radiation Safety Officer

Attention: Radiation Safety Officer or Marvin Feldman, CNMT, RSO

As you are no doubt aware, under the provisions of the Energy Policy Act of 2005 (EPAct), sometime between now and August 9, 2009, the Nuclear Regulatory Commission (NRC) will be assuming regulatory authority over all Radioactive Material some of which was regulated by the Missouri Radiation Control Program. As of that [as yet to be finalized] date, authority for licensing and enforcement actions in regard to all non-exempt quantities of Radioactive Material will be transferred to the NRC. Until that date, the MRCP's authority will continue. At some point in the future you will be contacted by the NRC to begin the process of applying for a new federal license for the continued possession and usage of your radioactive material (or, if applicable, amending your current NRC license).

To begin to prepare for and aid with the transition process, we have changed the expiration date of all current RAM registrations to August 10, 2009, based on the facility information currently in our database. Your facility last registered with our office on: **05/01/2006**

Enclosed is the registration we currently have on file for your facility, which will now be valid until the NRC assumes regulatory authority. You will only need to contact our office if conditions change or new RAM is added, or possession amounts need to be changed. In that case contact our office for an amendment to the registration, as you have in the past. If you no longer use or possess naturally occurring or accelerator produced radioactive material, please advise us by return mail or call (573) 751-6083. If you have additional questions, please do not hesitate to contact us and ask to speak with Tracy Roark, Gary Franklin (Medical Sources) or Chuck Arnold (non-Medical Sources).
