**Subject:** Uranium Recovery GEIS

Dear Mr. Park,

I want my taxes spent on beneficial projects. Fight to receive funding! Commission the studies needed for positive, long-term results. Money spent in this way is never wasted. Put our experts to work. Bombs are waste. Bailouts of the rich are waste. Environmental protection is not.

I am writing to you to ask that the NRC follow the National Environmental Policy Act (NEPA) and conduct individual environmental impact statements for all proposed in situ uranium mines. The people of the potentially impacted areas and communities deserve the respect and individual attention the NRC should be giving when considering something as potentially dangerous as an in situ uranium mine.

There is no one size fits all approach to uranium mining across the country and the NRC should be conducting individual assessments of the areas to make sure the environmental risks are taken into consideration. A GEIS will not spotlight potential problems in any of the proposed areas and could lead to devastating impacts on the environment, ecosystems and communities in the area.

Thank you,

Karen schairer
