or Report No(s).

Name of Licensee: State of Connecticut, Department of Public Health

Name of Participant(s): Carolyn Jean Webb, Radiation Safety Officer
Jack Bennett, Laboratory Manager
Steven R. Courtemanche, Health Physicist NRC RI

Telephone No. 860-509-8530, 860-509-8622, 610-337-5075

Subject: Questions concerning fees and license

(NOTE: This will be used as the Documents Title in ADAMS)

I left a message on Mr. Bennett's voice-mail that I would be calling Ms. Webb concerning their questions about the fee and licensing issues. Ms. Webb put me on speaker phone with Mr. Bennett in attendance. I informed them that discussions were had with the fee branch and that a 3P designation for the amount of fee would be placed in their records. The program code would remain 03620 which was for R&D other as that was the closest approximation we could get to what their activity would be. Mr. Bennett confirmed that the licensee would not be performing paid services for the state in relation to licensed activities. I then informed the licensee that source material would not need to be listed on the license as they fall under the general license of 10 CFR 40.22. Lastly, I informed the licensee that they would need to contact the manufacturer of the special nuclear material sources to determine if they could be distributed as general licensed items under 10 CFR 70.39. The licensee agreed to drop the request for special nuclear material and provide the model and manufacturer names of sealed sources they intend to obtain. If the special nuclear material sources required a specific line on the license, they would amend their license at a future date.

Action Required: Issue license w/o special nuclear material designations.
