Subject: Uranium Recovery GEIS

Dear Mr. Park,

This concerns the proposed in situ uranium mining. I am particularly concerned about groundwater pollution.

I ask that the NRC follow the National Environmental Policy Act (NEPA) and conduct INDIVIDUAL environmental impact statements for each proposed in situ uranium mine. The people of the potentially impacted areas and communities deserve the respect and individual attention the NRC should be giving when considering something as potentially dangerous as an in situ uranium mine.

There is no one size fits all approach to uranium mining across the country and the NRC should be conducting individual assessments of the areas to make sure the environmental risks are taken into consideration. A GEIS will not spotlight potential problems in any of the proposed areas and could lead to devastating impacts on the environment, ecosystems and communities in the area.

Thank you,

Robert M. Doerr
