Docket 50-312

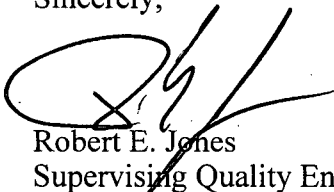

**RANCHO SECO DEFUELED SAFETY ANALYSIS REPORT UPDATE**

Attention: John Hickman

In accordance with 10 CFR 50.71(e) and Rancho Seco Decommissioning Order Condition (A), we are required to update the Rancho Seco Defueled Safety Analysis Report (DSAR) every 2 years. Since the last update on October 23, 2006, there have been no safety analyses or evaluations performed that require a license amendment or a change to the DSAR at this time. We anticipate a significant change to the SAR after we complete final status surveys and the NRC has reduced the footprint of the 10 CFR Part 50 licensed facility.

If you, or members of your staff, have questions requiring additional information or clarification you may contact me at (916) 732-4843.

Sincerely,

Robert E. Jones  
Supervising Quality Engineer
