

**UNITED STATES
NUCLEAR REGULATORY COMMISSION
ADVISORY COMMITTEE ON REACTOR SAFEGUARDS
WASHINGTON, DC 20555 - 0001**

November 14, 2008

MEMORANDUM TO: R. W. Borchardt
Executive Director for Operations

FROM: Edwin M. Hackett, Executive Director
Advisory Committee on Reactor Safeguards

SUBJECT: SUPPLEMENT 1 TO NUREG-1875, "SAFETY EVALUATION REPORT
RELATED TO LICENSE RENEWAL OF OYSTER CREEK
GENERATING STATION"

During the 557th meeting of the Advisory Committee on Reactor Safeguards, November 6-7, 2008, the Committee considered Supplement 1 to NUREG-1875, "Safety Evaluation Report (SER) Related to License Renewal of Oyster Creek Generating Station," which documents clarifications provided by the applicant to drywell shell aging management program commitments. It also documents the staff's evaluation of the applicant's response to an April 2008 request for additional information regarding the use of Green's function in calculating fatigue cumulative usage factors for certain Oyster Creek components. The staff concluded that the previous conclusions regarding the fatigue cumulative usage factors in the final SER remain valid. The Committee decided not to review Supplement 1 to NUREG-1875. No response to this memorandum is required.
