**Subject:** Uranium Recovery GEIS

Dear Mr. Park,

I am writing to ask that the NRC follow the National Environmental Policy Act (NEPA) and conduct individual environmental impact statements for all proposed in situ uranium mines. The people of the potentially impacted areas and communities deserve the respect and individual attention when the NRC is considering something as potentially dangerous as an in situ uranium mine.

There is no one-size-fits-all approach to uranium mining. The NRC must conduct individual assessments of proposed areas to make sure the environmental risks are taken into consideration. A GEIS will not spotlight potential problems in any of the proposed areas and could lead to devastating impacts on the environment, ecosystems, and communities in the area.

Thank you,

Tamera Bryant
