

## TECHNICAL ASSISTANCE REQUEST

Date: 12/03/2002		TAR Number:	
To: Division of Waste Management, ATTN: Larry Camper, Branch Chief		From: Region III, DNMS, Decommissioning Branch, Christopher G. Miller, Branch Chief, (630) 829 9633 	
Licensee Name: Westinghouse Electric Company, Hematite Fuel Fabrication Facility, Festus, Missouri		License Number: SNM-33	
Referenced Document: Draft, REMEDIAL INVESTIGATION FEASIBILITY STUDY WORK PLAN (RIFS) for the Westinghouse Electric Company LLC Hematite Missouri Facility 3300 State Road P Festus, MO 63028 (CD & Hard copy), 12/03/2002 MDNR RIA letter to Westinghouse regarding RIFS (hard copy only).		Document Date: Oct 2002 (draft) currently being reviewed by the Missouri Department of Natural Resources.	
<p>Objective: DWM hydro geological and geological technical support, related to the evaluation and assessment of potential subsurface and ground-water impacts due to the decommissioning of a former fuel fabrication facility. The support would include assessment of areas associated with the review of licensee's earlier site characterization and other studies., conducted under the CERCLA process for the site clean-up. This would also include DWM support at technical meetings with the State MDNR and licensee, as required The scope of this effort is not expected to exceed 180 hours over a period 1 year.</p>			
Action Required: Provide long term support. See objective section above			
Relevant Regulations: 10 CFR 20.1402 Relevant Guidance: SRP 1727/ NUREG 1757			
Remarks (including cognizant staff): Amir Kouhestani, is familiar with the issues on CERCLA and LTR.			
Regional Project Manager: George M. McCann		E-Mail: gmm	Phone: 630 829 9856
Regional Contact: Same as PM		E-Mail:	Phone:
Date Requested: 12/03/02			
Review Priority: Medium		Reason: Public and Congressional interest decommissioning of site. Significant chemical ground water contamination with potential for radiological contamination migration into off-site groundwater as well.
