SUBJECT: SUMMARY OF OCTOBER 30, 2008 PUBLIC MEETING/  
TELECONFERENCE WITH THE U.S. DEPARTMENT OF ENERGY  
TO DISCUSS THE FORTHCOMING SUPPLEMENTATION OF THE  
ENVIRONMENTAL IMPACT STATEMENT FOR THE PROPOSED  
GEOLOGIC REPOSITORY AT YUCCA MOUNTAIN, NEVADA

On October 30, 2008, U.S. Nuclear Regulatory Commission (NRC) staff conducted a public teleconference to discuss the U.S. Department of Energy's (DOE's) forthcoming supplement to its environmental impact statements (EISs) for the proposed geologic repository at Yucca Mountain, Nevada. Members of the public were invited to participate as listeners.

NRC staff presented the information contained in its Adoption Determination Report for the EISs, concerning staff conclusions on the need for supplemental information and analyses on the potential impacts on groundwater, and from groundwater discharges to the surface. To further illustrate the NRC staff's position concerning supplementation, the staff highlighted two figures from DOE's license application that were not included in the EISs: Figure 5-41 from the General Information section depicts groundwater flow paths in the Central Death Valley Subregion, and Figure 2.3.1-6 from the Safety Analysis Report depicts locations important for assessing past and future climate estimates. DOE staff members did not have any substantive questions, and stated that they understood what to include in their supplement.

In addition to staff from NRC, DOE, and the Center for Nuclear Waste Regulatory Analyses, more than 20 stakeholders and members of the public listened in, on the call, including representatives from the State of Nevada, the affected counties (Nye, Clark, Churchill, Esmeralda, Lander, Mineral, Lincoln, White Pine, and Inyo), the Nuclear Energy Institute, Jason Associates, and Senator Ensign's and Senator Reid's offices.
