Dockets No. 52-025 and 52-026	)
	)

DECLARATION OF ANNIE LAURA STEPHENS

Under penalty of perjury, Annie Laura Stephens declares as follows:

1. My name is Annie Laura Stephens. I am a member of Atlanta Women's Action for New Direction (Atlanta WAND).

2. I live at 146 Nathaniel Howard Road, Waynesboro, Georgia 30830. My home lies within 11.1 miles of the site in Burke County, Georgia, for which Southern Nuclear Operating Company has applied to the U.S. Nuclear Regulatory Commission ("NRC") for a Combined License for the construction and operation of two new nuclear power plants.

3. My concerns are related to the health and safety. Based on historical experience with nuclear reactors to date, I believe that these facilities are inherently dangerous. Therefore, construction of one or more new nuclear reactors so close to my home could pose a grave risk to my health and safety. In particular, I am concerned that if an accident involving atmospheric/environmental release of radiological material were to occur, I could be killed or become very ill.

4. I believe that the Plant Vogtle COL application is inadequate as written and that my interests will not be adequately represented in this action without the opportunity of Petitioner to intervene as a party in the proceeding on my behalf.

5. Therefore, I have authorized Atlanta Women's Action For New Direction (Atlanta WAND) to represent my interests in this proceeding by opposing the issuance of a Combined License to the Southern Nuclear Operating Company.

DECLARATION OF Sam Booher

Under penalty of perjury, Sam Booher declares as follows:

1. My name is Sam Booher. I am a member of the Center for a Sustainable Coast.

2. I live at 4387 Roswell Drive, Martinez, GA 30907. My home lies within 37 miles of the site in Burke County, Georgia, for which Southern Nuclear Operating Company has applied to the U.S. Nuclear Regulatory Commission ("NRC") for a Combined License for the construction and operation of two new nuclear power plants.

3. Based on historical experience of ever decreasing water flow in the Savannah River, I believe that expanding Plant Vogtle is inherently dangerous because the Savannah River will not be able to safely provide sufficient water for cooling the new planned reactors. Therefore, construction of one or more new nuclear reactors so close to my home could pose a grave risk to my health and safety. In particular, I am concerned that if an accident involving atmospheric release of radiological material were to occur, I could be killed or become very ill.

4. I believe that the Plant Vogtle COL application is inadequate as written and that my interests will not be adequately represented in this action without the opportunity of Petitioner to intervene as a party in the proceeding on my behalf.

5. Therefore, I have authorized David Kyler, Center for a Sustainable Coast to represent my interests in this proceeding by opposing the issuance of a Combined License to the Southern Nuclear Operating Company.

DECLARATION OF Stephen N. Willis

Under penalty of perjury, Stephen N. Willis declares as follows:

1. My name is Stephen N. Willis. I am a member of The Center for a Sustainable Coast.

2. I live at 801 East Victory Drive, Savannah, Georgia 31405. My home lies within 120 miles of the site in Burke County, Georgia, for which Southern Nuclear Operating Company has applied to the U.S. Nuclear Regulatory Commission ("NRC") for a Combined License for the construction and operation of two new nuclear power plants.

3. Based on historical experience with nuclear reactors, I believe that as a sportsman, naturalist, and resident living within the Savannah River Basin, the proposed nuclear reactor construction and operation will have serious negative impacts on my personal avocation and welfare. This danger of negative impacts include the consumptive use of enormous amounts of water from the river, which, especially in times of drought, will reduce river flow and allow intolerable levels of salt water intrusion into my immediate residential area, while endangering the health of all natural resources in the lower reaches of the Savannah River Basin. Additionally, the flushing of warm water back into the river, even after partial cooling, threatens to disrupt the ecology of the river, making algae bloom and unhealthy conditions for many aquatic species probable. Worse, the reactors threaten unlikely but possible catastrophic disaster, either intentionally or unintentionally, which could have grave consequences upon the natural and human health, safety and welfare over hundreds of square miles around the reactors, and throughout the Savannah River Basin.

4. I believe that the Plant Vogtle COL application is inadequate as written and that my interests will not be adequately represented in this action without the opportunity of Petitioner to intervene as a party in the proceeding on my behalf.

5. Therefore, I have authorized The Center for a Sustainable Coast to represent my interests in this proceeding by opposing the issuance of a Combined License to the Southern Nuclear Operating Company.

DECLARATION OF [INSERT NAME]

Under penalty of perjury, Judith E. Gordon declares as follows:

1. My name is Judith E. Gordon. I am a member of Savannah Riverkeeper.

2. I live at 5452 Clanton Woods Drive, Evans, GA 30809. My home lies within about 37 miles of the site in Burke County, Georgia, for which Southern Nuclear Operating Company has applied to the U.S. Nuclear Regulatory Commission ("NRC") for a Combined License for the construction and operation of two new nuclear power plants.

3. Based on historical experience with nuclear reactors to date, I believe that these facilities are inherently dangerous. Therefore, construction of one or more new nuclear reactors so close to my home could pose a grave risk to my health and safety. In particular, I am concerned that if an accident involving atmospheric release of radiological material were to occur, I could be killed or become very ill.

In addition, I am concerned about the amount of water Plant Vogtle will additionally draw from the Savannah River, particularly if global warming results in more frequent drought conditions. This loss of water from the river could negatively impact the ecology of this river system. These potential problems have not been adequately addressed. Furthermore, the United States government has yet to solve the problem of storing radioactive wastes in a secure repository. The additional waste generated by expansion of Plant Vogtle will only add to the problem and increase the potential for accidents and terrorist attacks at the site as well as during transport of wastes if a repository should ever be designated.

4. I believe that the Plant Vogtle COL application is inadequate as written and that my interests will not be adequately represented in this action without the opportunity of Petitioner to intervene as a party in the proceeding on my behalf.

5. Therefore, I have authorized Savannah Riverkeeper to represent my interests in this proceeding by opposing the issuance of a Combined License to the Southern Nuclear Operating Company.

1. My name is Harvie Dixon Jr. I am a member of Blue Ridge Environmental Defense League.

2. I live at 277 Wellborn P.O Box 126, Blythe, Ga. 30805.

My home lies within 45 miles of the site in Burke County, Georgia, jointly owned by Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia and the City of Dalton for which Southern Nuclear Operating Company has applied to the U.S. Nuclear Regulatory Commission for a combined license for the construction and operation of two new nuclear power plants.

3. Based on historical experience with nuclear reactors to date, I believe that these facilities are inherently dangerous. Therefore, construction of these new nuclear reactors so close to my home could pose a grave risk to my health and safety. In particular, I am concerned about routine releases of radioactive substances to the air and water. Also, if an accident involving the release of radioactive material were to occur, I could be killed or become very ill.

4. Therefore, I have authorized Blue Ridge Environmental Defense League to represent my interests in this proceeding by opposing the issuance of a combined license to Southern Nuclear Operating Company.

Therefore, construction of these new nuclear reactors so close to my home could pose a grave risk to my health and safety. In particular, I am concerned about routine releases of radioactive substances to the air and water. Also, if an accident involving the release of radioactive material were to occur, I could be killed or become very ill.

4. Therefore, I have authorized Blue Ridge Environmental Defense League to represent my interests in this proceeding by opposing the issuance of a combined license to Southern Nuclear Operating Company.

DECLARATION OF STANDING

Under penalty of perjury, Nelson Stokes declares as follows:

1. My name is Nelson Stokes. I am a member of Blue Ridge Environmental Defense League.

2. I live at Burke/168 Spring Branch Church Rd, Waynesboro, GA 30830

My home lies within 10- miles of the site in Burke County, Georgia, jointly owned by Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia and the City of Dalton for which Southern Nuclear Operating Company has applied to the U.S. Nuclear Regulatory Commission for a combined license for the construction and operation of two new nuclear power plants.

3. Based on historical experience with nuclear reactors to date, I believe that these facilities are inherently dangerous. Therefore, construction of these new nuclear reactors so close to my home could pose a grave risk to my health and safety. In particular, I am concerned about routine releases of radioactive substances to the air and water. Also, if an accident involving the release of radioactive material were to occur, I could be killed or become very ill.
