Attn: Mr. James P. O'Reilly, Regional Administrator
101 Marietta Street, Suite 3100
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - SUPPORT DRAWINGS DESIGNED BY EDS
NUCLEAR - WBRD-50-390/81-62, WBRD-50-391/81-58 - SUPPLEMENTAL INFORMATION

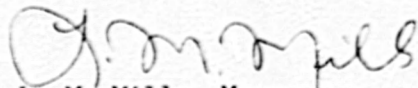

The subject deficiency was initially reported to NRC-OIE Inspector R. V. Crlenjak on July 13, 1981 in accordance with 10 CFR 50.55(e) as NCR WBN SWP 8149. Our final report was submitted on October 13, 1981. We consider 10 CFR 21 applicable to this deficiency.

In that final report, TVA committed to complete corrective actions on this deficiency by December 31, 1981. However, because the stud bolts which are to be provided by the pressurizer safety valve manufacturer have not yet been received by TVA, we now expect to have the corrective actions completed by May 1, 1982. This matter was discussed with Inspector R. V. Crlenjak on March 11, 1982.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
