Subject: NRC Issues Advanced SER for VEGP ESP and LWA

This notice is being sent to interested parties to announce the issuance of the Nuclear Regulatory Commission (NRC) advanced Safety Evaluation Report (SER), dated November 12, 2008, for the early site permit (ESP) application and limited work authorization (LWA) request for the Vogtle Electric Generating Plant (VEGP) site.

The purpose of the advanced SER is to document the staff's evaluation of the ESP application and LWA request, including a description of the resolution of open items identified in the SER with open items issued in August 2007. The advanced SER provides information for the use of the Commission, the Atomic Safety Licensing Board (ASLB), and the Advisory Committee on Reactor Safeguards (ACRS) in their determinations regarding issuance of an ESP and LWA for the VEGP ESP site.

The NRC allowed Southern Nuclear Operating Company (SNC) 5 days to review the advanced SER for proprietary information prior to being made publicly available. As of today, the advanced SER is publicly available in the NRC's Agencywide Documents Access and Management System (ADAMS) under accession number ML080290280, and the cover letter can be accessed at accession number ML083150627. The NRC maintains ADAMS, which provides text and image files of NRC's public documents. These docuemtns may be accessed through the NRC's Public Electronic Reading Room on the internet at http://www.nrc.gov/reading-rm/adams.html. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) Reference staff at 1-800-397-4209 or by email to pdr@nrc.gov.

In addition, the advanced SER has been posted on the NRC's VEGP ESP and LWA review website located on the internet at http://www.nrc.gov/reactors/new-reactors/esp/vogtle.html . If you have any question please feel free to contact me at 301-415-3637.
