so far, we've asked VY, Wolf Creek, and OC ... RAIs are going out to Indian Point, as well (I think they were supposed to go out yesterday, but I can't confirm). We're still looking at the applications we have in-house, so there may be more to follow.

Louise,

I need to answer a question from an AP reporter in Vermont on which other plants, besides VY, are being asked to do metal fatigue reanalysis. Do you know or can you find out for me? Apparently, the list was brought up at the ACRS meeting on VY.

The reporter is also asking questions about a consultant that performed the initial calculations. I'll forward that on to you when I get it.

Neil
