Bureau of Economic Analysis

Regional Economic Accounts

Local Area Personal Income

Step 1. Select a table

AMSA—Advance MSA personal income and compensation summary tables
CA1-3—Personal income, population, per capita personal income
CA04—Personal income and employment summary
CA05—Personal income and detailed earnings by industry
CA06—Compensation by industry
CA25—Total employment by industry
CA30—Regional economic profiles
CA34—Total wages, wage employment, average wage per job
CA35—Personal current transfers detail
CA45—Farm income and expenses
CA91—Gross Commuters' Earnings Flows
Single Line—Single line of data for all counties (more than 3000 rows returned; please limit years selected to speed process) for all counties

Step 2. Select SIC or NAICS industrial detail.

CA25N NAICS (2001-2006)
CA25 SIC (1969-2000)

Notes:

New estimates for 2006 and revisions for 2004-2005 were released on April 24, 2008. These estimates incorporate newly available source data. Additionally population and per capita personal income estimates were revised back to the year 2000.

These estimates incorporate the November 2007 update to the OMB metropolitan area definitions.

Help:

- Use the CTRL and/or Shift keys to select multiple areas and years. (In the Local Area Personal Income application mulitple areas are not selectable; select one state and proceed from there, or select the "Single Line" option in Step 1.) Press *Display* to display your selection in HTML tables, and *Download* to download a comma-separated-value text file. If you select *Download* a "Save As" dialog box will appear. It is recommended that you specify an output filename with a CSV extension. Some users will have the option to open the downloaded file directly into a spreadsheet application.
- The greater the number of areas and years selected, the slower the request will be. A submission that requests too much information has the possibility of timing out. If you are displaying information, you will want to consider how large your table will be.
- To view county-level information first display a State.
- After displaying a table, you have the option to show one estimate for all counties and MSAs in that State by clicking on the line code next to the estimate.

Additional statistics

- Interactive Maps — The local area estimates in the above tables are also available in a mapping application, Personal Income and Employment Interactive Map
- Interactive Charts and Graphs — The local area estimates in the above tables are also available in a charting application, Regional Economic Accounts Interactive Charts and Graphs
