Subject: choice of Kd values for NRC-TPA model

Paul
I am looking for documentations regarding the choice of Kd values for NRC-TPA model. Your name was suggested to me by Dr. James Winterley as the person most up on this issue. I wonder if you can point me to any publicly available information on the subject.

I am a staff member at the Los Alamos National Laboratory, and work on modeling transport through the saturated zone at the Yucca Mountain for the YMP>
thank you for your attention
