Mr. Thompson,

Per our telephone conversation today, the FBI Laboratory was never in possession of byproduct material with atomic numbers 1 through 83 as listed on the current license. The material was originally requested with the intent at some point for the Laboratory were to perform atomic absorption or if evidence was received in that range. All radioactive evidence is sent to the Savannah River off-site laboratory, and the decision was made not to perform atomic absorption.

Please contact me if there are any other questions.

Sincerely,

Leslie M. McCauley
Radiation Safety Officer
FBI Laboratory
Quantico, VA
