Re: Saving spent fuel rods from disposal.

Dear Annette

I am a journeyman electrician working in the Chicago land area.
I have heard about the fuel rod disposal issue, and the millions of dollars
spent to do this.

I have a possible solution for this problem.

My concept is to re - use the fuel rods.

What I propose is to " reactivate " the nuclear fuel material inside the rod.
Increasing the nuclear fuels value to as close as possible to the original value
when it was installed into the reactor.

I have two possible process theory's to do the " reactivation " of the fuel.

I would like to discuss this with
you.

If this could be

accomplished, it would save
our power company's and our nations problems with this profound issue.

Thank you, Annette

Tony Fiello
Hoffman Estates, IL.
