STORAGE AND CONTROL OF LICENSED OR REGISTERED SOURCES OF RADIATION

Sec. D.801 Security of Stored Sources of Radiation. Sources of radiation shall be secured against unauthorized removal or access from the place of storage.

Sec. D.802 Control of Sources of Radiation Not in Storage.

a. The licensee shall control and maintain constant surveillance of licensed radioactive material that is in an unrestricted area and that is not in storage or in a patient.

b. The registrant shall maintain control of radiation machines that are in an unrestricted area and that are not in storage.

Section D.803 Security Requirements for Portable Gauges.

a. Each portable gauge licensee shall use a minimum of two independent physical controls that form tangible barriers to secure portable gauges from unauthorized removal whenever portable gauges are not under the control and constant surveillance of the licensee.

b. The licensee shall ensure that the source locking mechanism for each device is engaged in the secured and fully shielded position during storage and transport.
