Calvert Cliffs -3 Nuclear Power Plant  
Combined Construction and Operating License

---

Docket No. 52-016

**ERRATA OF JOINT PETITIONERS CLARIFYING INTERVENORS AND STANDING  
AND OTHER CORRECTIONS**

Now comes Nuclear Information and Resource Services, Beyond Nuclear, Public Citizen, Southern Maryland Citizens for Affordable Renewable Energy Solutions here after referenced as Joint Petitioners to make the following corrections in the Petition for Public Hearing and Leave to Intervene as filed on November 19, 2008 regarding to Calvert Cliff Unit 3 Combined Operating License Application.

At Page 1 of 53 Paragraph 1, Joint Petitioners mistakenly misidentifies Maryland Public Interest Research Group (MDPIRG) as a petitioner in the Calvert Cliffs-3 Nuclear Power Plant Combined Construction and Operating License Application. In fact, MDPIRG did not request to intervene and did not provide a declaration for standing.

Instead, the paragraph should correctly read and identify joint petitioners as Nuclear Information and Resource Service, Beyond Nuclear, Public Citizen and Southern Maryland Citizens for Affordable Renewable Energy Solutions (SO MD CARES).

At Page 4 of 53 Paragraph 2, the petition introduces the petitioner Southern Maryland Affordable Renewable Energy Solutions (SO MD CARES) but mistakenly misidentifies the group as "Southern Maryland Affordable Renewable Solutions."

Exhibit 7 is provided in the original filing as the declaration of Steven Warner in support of SO MD CARES standing in this proceeding.

This Errata makes the correction to correctly identify the intervening group and joint petitioner as Southern Maryland Citizens for Affordable Renewable Energy Solutions or "SO MD CARES."

At Page 4 of 53 Paragraph 4 begins with the header "Some materials for the Calvert Cliffs-3 COLA have not been posted on NIRS' website. Joint petitioners request an extension of time to modify contentions and/or file new contentions based on information not yet posted."

As is reflected in the body of the text following the header, the mistaken reference to the “NIRS website” should be corrected to instead read, “Some materials for the Calvert Cliffs-3 COLA have not been posted on the NRC website.” The remaining text is correct.

Respectfully Submitted,
