

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

December 11, 2008

MEMORANDUM TO: Robert Nelson, Deputy Division Director
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation

FROM: Mahesh Chawla, Project Manager *Chawla*
Plant Licensing Branch III-1
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation

SUBJECT: LIC-109 ACCEPTANCE REVIEW FOR LICENSE AMENDMENT
REQUEST FOR SPENT FUEL POOL REGION I CRITICALITY FOR
PALISADES (TAC NO. ME0161)

The above license amendment request (LAR) was submitted by Palisades in its application dated November 25, 2008. This LAR is required to correct the present Palisades Spent Fuel Pool (SFP) criticality issues caused by degradation of the SFP storage racks. To support fuel pool operations necessary to accommodate 2009 refueling activities, the licensee has requested a completion date of February 12, 2009. This provides a period of only two and a half months for the staff to complete its review. In accordance with LIC-109, Section 3.1, the staff has decided not to perform the acceptance review. This decision is due to the short turnaround time for the LAR, whereby any issues that would normally be identified during the acceptance review would be more efficiently resolved by the NRC staff beginning the detailed technical review directly.

Docket No. 50-255
